

SQL Learning Journal #3 – FILTERING DATA

1. SQL Commands Learned Today

a. **SELECT** field_name

FROM table_name

WHERE field_name>1973;

b. **SELECT** field_name

FROM table_name

WHERE field_name =1973;

c. **SELECT** field_name

FROM table_name

WHERE field_name<>1973; *(Note: It means taht not equal to)*

d. **SELECT** field_name

FROM table_name

WHERE field_name >=1973;

e. WHERE command and strings

SELECT field_name

FROM table_name

WHERE field_name= "john";

2. Learning Notes:

What I learned today is important to understand WHERE Works with SELECT. SELECT command decide according to filtering from field in the table with WHERE.
