

# SQL Learning Journal #11- SUMMARY

## # 📖 Introduction

Today I reviewed and summarized the main SQL concepts that I have learned so far. This summary helped me reinforce the fundamental SQL commands and understand how they work together when querying data.

## ## 1. Selecting Data

- `SELECT`
- `COUNT()`
- `DISTINCT`
- `LIMIT`

## ## 2. Filtering Data

- `WHERE`
- `BETWEEN`
- `AND`
- `OR`
- `LIKE`
- `IN`
- `IS NULL`
- `IS NOT NULL`

## ## 3. Aggregate Functions

- `AVG()`
- `SUM()`
- `MIN()`
- `MAX()`
- `COUNT()`
- `ROUND()`

## **## 4. Sorting and Grouping Data**

- `ORDER BY`
- `ASC`
- `DESC`
- `GROUP BY`
- `HAVING`

## **## 5. Comparison Operators**

- `=`
- `<>`
- `>`
- `<`
- `>=`
- `<=`

## **## 6. Arithmetic Operators**

- `+`

- ``

- `\*`

- `/`

## # What I Learned Today

Today I reviewed the SQL concepts that I have learned during the first eleven lessons. I realized that understanding each command individually is important, but combining them effectively requires regular practice. My next goal is to continue solving more SQL exercises to improve both my speed and accuracy.
